This presentation has three parts. The first part has my comments regarding Redistricting Partners’ three draft plans for the seven SJECCD trustee areas. The second and third parts have two alternative redistricting plans for SJECCD’s seven trustee areas.

Comments Regarding Redistricting Partners’ Three Draft Plans for the Seven SJECCD Trustee Areas

None one of Redistricting Partners’ three redistricting draft plans for the seven SJECCD trustee areas should be enacted as is. If either Draft Plan A or Draft Plan C is implemented, Trustee Area 7 would transition to a Hispanic plurality trustee area; in its present form Trustee Area 7 is a Hispanic majority trustee area. Plan B’s Trustee Area 2 would have a five percentage decrease in its Hispanic percentage. Plan B would transfer majority Asian areas which are at present in either Trustee Area 1 or Trustee Area 3 into Trustee Area 2. Plan B splits Milpitas and the Milpitas Unified School District into Trustee Areas 1 and 3.

I present two redistricting plans, as alternatives to Redistricting Partners’ three draft redistricting plans for the seven SJECCD trustee areas. The second plan (Alternative Redistricting Plan #2) is more similar to the present redistricting plan than is the first plan. However, the first plan (Alternative Redistricting Plan #1) may be classified as a less complicated redistricting plan.

In both Alternative Redistricting Plan #1 and Alternative Redistricting Plan #2, Trustee Area 7 has a 2020 Census Hispanic majority. In both redistricting plans Milpitas and the Milpitas Unified School District are in Trustee Area 1, not in both Trustee Areas 1 and 3.¹

¹ According to the U.S. Census Bureau’s Milpitas and Milpitas Unified School District boundaries.
Alternative Redistricting Plan #1

The constituent school districts of the SJECCD are color coded. School district boundaries according to the U.S. Census Bureau and the actual boundaries of school districts may vary. Perhaps the school district boundaries according to the U.S. Census Bureau could be considered as generalized school district boundaries. The school district boundaries of this presentation are school district boundaries according to the U.S. Census Bureau. The portion of the SJECCD to and within the Alviso area would be part of Trustee Area 1. Not all of the Orchard School District is part of the SJECCD. Possible boundary adjustments may be mentioned only once. Thus, for a higher numbered trustee area it is important to review the information for lower numbered trustee areas. Not all proposed trustee area boundary adjustments for this redistricting plan may be mentioned. The population data in this presentation may be 2020 Census and/or adjusted 2020 Census data. The author of this presentation does not guarantee the accuracy of the information in this presentation.

---

* The portion of the SJECCD to and within the Alviso area would be part of Trustee Area 1. Not all of the Orchard School District is part of the SJECCD.
The boundary between Trustee Areas 1 and 7 would be adjusted to be more closely aligned although not completely aligned with the Orchard School District/San José Unified School District boundary, according to the U.S. Census Bureau’s Orchard Elementary School District/San José Unified School District boundary.

Between Montague Expressway/Landess Avenue and Mabury Road the boundary between Trustee Areas 1 and 3 would be Interstate 680.
The boundary south of McKee Road and east of U.S. Route 101 between Trustee Areas 2 and 7 would be adjusted to be more closely aligned with the Alum Rock Union School District/San José Unified School District boundary, according to the U.S. Census Bureau’s Alum Rock Union Elementary School District/San José Unified School District boundary.
Trustee Area 2 would not have any area (or areas) west of U.S. Route 101.

Between East Capitol Expressway and South White Road the boundary between Trustee Areas 2 and 4 would be Tully Road.
The boundary between Trustee Areas 2 and 3 would be adjusted. A number of Alum Rock Union School District census blocks which are at present part of Trustee Area 3 would be in Trustee Area 2. Trustee Area 2 would have a portion of the Berryessa Union School District; this portion of the Berryessa Union School District has a population of 2,100 (to the nearest hundred) and a Hispanic/Latinx plurality. A three census block area south of McKee Road with a population of 1,300 and an Asian majority would be in Trustee Area 3.
